### Features

**Type**
- Low voltage non programmable electronic thermostat.
- Standard: white.
- 24Vac, 50/60 Hz.
- 1A per output (2 outputs).

**Mode**
- **First output (main):**
  - A mode: Ambient temperature control.
  - Note: Floor temperature can be controlled using an external temperature sensor when a floor heating cable is used as the heating source.
  - F mode: Floor temperature control using an external temperature sensor with ability to control the ambient temperature.
- **Second output (auxiliary):**
  - The second output is activated if the first heating system controlled by the first output cannot reach the temperature setpoint.

**Control**
- 15-second cycle or 5, 10, 15, 20, 25, 30-minute cycle (individually adjustable on each output).
- Adjustment of the minimum Time ON and minimum Time OFF on the main output.
- Defines the minimum time for which the output can be turned ON or turned OFF (used for heating system with a purge).
- Pump exercise OFF/ON (if set to ON, the thermostat activates its main output for 1 minute every 24 hours to prevent pump from seizing).
- Resolution: ± 0.5 °C (1 °F).

**Display**
- Digital display of ambient temperature (°C or °F), heating level indicator and temperature setpoint.
- Backlit - permanent or activated on request.
- Temperature setting recorded permanently.

**Temperature range**
- 5 °C to 36 °C (41 °F to 97 °F).

**Storage Temperature**
- -20 °C to 50 °C (-4 °F to 158 °F).

**Installation**
- 3-wire thermostat (minimum).

**Application**
- 2 low voltage outputs that can be connected using a 24V relay and a transformer to control electric baseboard heaters, convectors, forced-air convectors, electric heating floors, water pumps and boilers. **Note:** Select the cycle according to the type of heating.

**Warranty**
- 3-year warranty against defects.
