## OTH4000

### Non Programmable Electronic Thermostat

CSA-C828-06 Performance Standard

### Features

- |                   |                                                                                                                                                                                                                        |
|-------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Type              | - Non programmable electronic proportional pulsing line voltage thermostat.                                                                                                                                            |
| Color             | - Standard: white.                                                                                                                                                                                                     |
| Voltage           | - 120/208/240V, 50/60 Hz.                                                                                                                                                                                              |
| Rating            | - Maximum load: 16.7A at 120/208/240V.<br>- Minimum load: 1.25A at 120/208/240V.                                                                                                                                       |
| Control           | - 10-minute cycle (fan-forced convector) or 15-second cycle (convector).<br>- Resolution: 0.5 °C (1 °F).<br>- Precision: ± 0.15 °C (0.27 °F) on 15-second cycle.<br>- Precision: ± 0.5 °C (0.1 °F) on 10-minute cycle. |
| Temperature range | - 5 °C (41 °F) to 30 °C (86 °F).                                                                                                                                                                                       |
| Display           | - Digital screen with white LED backlit.<br>- Display fan-forced heater mode and keypad lock (when activated).<br>- Choice of temperature display format (°C or °F).                                                   |
| Other feature     | - Temperature setpoints recorded permanently in case of a power outage.<br>- Ability to set minimum and maximum setpoints.<br>- Night light mode for the display LED.                                                  |
| Installation      | - 2-wire thermostat, easy to install.                                                                                                                                                                                  |
| Application       | - Baseboard heater, radiant ceiling, convector and fan-forced convector.                                                                                                                                               |
| Warranty          | - <b>3-year warranty against defects.</b>                                                                                                                                                                              |

### Model

Product #	Description	Volts	Watts	Qty
OTH4000	Non programmable electronic proportional pulsing line thermostat	120/208/240	2000/3465/4000	

Standard color is white.
