

COMPRESSOR HEATER

Our CMPHTR Compressor Heater is a cutting-edge solution designed to safeguard your compressors and ensure optimal performance even in the harshest conditions. Crafted with precision and reliability in mind, this heater incorporates self-regulating heating cable technology, delivering efficient heating while minimizing energy consumption. With a focus on durability and ease of installation, our Compressor Heater offers unmatched performance and peace of mind for industrial and commercial applications.

FEATURES & BENEFITS

1. Self-Regulating Heating Cable:

- Feature: Advanced self-regulating technology adjusts heat output based on ambient temperature, ensuring consistent and reliable heating.
- Benefit: Saves energy by only heating when and where needed, reducing operational costs and enhancing efficiency.

2. Durable Construction:

- Feature: Robust construction built to withstand harsh environments and extreme temperatures.
- Benefit: Provides long-lasting protection for compressors, extending their lifespan and minimizing maintenance costs.

3. Easy Installation:

- Feature: Simple installation process requires minimal expertise and time.
- Benefit: Reduces downtime during installation, enabling swift deployment and ensuring uninterrupted operations.

4. Customizable Length:

- Feature: Available in various lengths to accommodate different compressor sizes and configurations.
- Benefit: Offers flexibility and versatility, allowing for tailored solutions to meet specific heating requirements.

5. Safe Operation:

- Feature: Equipped with safety features to prevent overheating and ensure reliable operation.
- Benefit: Enhances workplace safety and minimizes the risk of equipment damage or failure due to excessive heat.

SUGGESTED USE

The Compressor Heater is ideally suited for a wide range of industrial and commercial applications, including:

- Refrigeration units
- Air compressors
- HVAC systems
- Industrial machinery
- Outdoor equipment

THIRD-PARTY APPROVALS

Our Self Regulating Cable has been rigorously tested and certified by third-party organizations to meet industry standards for safety and performance. Approvals include:

- UL (Underwriters Laboratories)
- FM (Factory Mutual)
- CSA (Canadian Standards Association)

Model Number	Wattage	Voltage	Assembly Length (inches)	Cordset Type	Max Temp	Cable Jacket	Max Compressor Diameter (inches)
HT-CMPHTR-L10-120-12	120 Watts	120	144	SJOW 5-15	185 F	Fluoropolymer	44
HT-CMPHTR-L10-120-8	80 Watts	120	96	SJOW 5-15	185 F	Fluoropolymer	30
